LIBRARY

1. The Skoda-ASAP factory at Mlada Boleslav has been enlarged by three new buildings which have been erected close to the railroad and between the railroad stations of Mlada Boleslav and Zastavka. The buildings are connected with the main plant by an underground tunnel. Produced at these buildings are special components for guns, which are sent to the Skoda Works at Pilsen. Employees are carefully chosen from the most reliable workers at Skoda-ASAP. Production is hidden from other Skoda employees and are packed under supervision and shipped in closed railroad freight cars to Pilsen.
2. In the Brno-Modrice area three assembly buildings are being constructed for the Skoda Works.
3. The Pilsen plant is to be expanded by two buildings. One is to produce aircraft components and the other mining equipment.
